Residential Premium Garden Maintenance

Premium Garden Maintenance services are ideal for people who wish to have their gardens immaculate at all times. Our Qualified Horticulturist visits the property to assess its individual garden maintenance needs. Taking into account the size of your garden combined with the amount of detail or “standard” that you wish to maintain, they will then prescribe an appropriate schedule. If it has been a while since your garden has been maintained, an initial “Garden Clean Up” may be required. This is so that your garden can be restored to a level that can be maintained effectively. Your Horticulturist will advise you if this is necessary.

Packages may include:

- Hand weeding and cultivating of garden beds
- Pruning and shaping of trees / shrubs
- Pest and disease control
- Fertilising of garden beds and lawns
- Irrigation system maintenance
- Hand & ride on mowing and edging of lawns
- Rubbish removed i.e. branches, lawn clippings, weeds and leaves
- Site tidy up i.e. sweep / blow pathways, driveways, carparks
- Horticultural advice, customised checklist
